

Hidden Markov Models

Jenny Copara

Definition

HMMs are tool for modelling time series data.

HMMs

Definition

$$p(x_1, \dots, x_n, y_1, \dots, y_{n+1}) = \prod_{i=1}^{n+1} q(y_i | y_{i-2}, y_{i-1}) \prod_{i=1}^n e(x_i | y_i)$$

HMM

Number of sequences is given by: $|S|^n$

$|S|$: number of elements in tag set, number of tags to be predicted

n : length of sequence to be predicted

Code

<https://github.com/luisguiserrano/hmm/blob/master/Simple%20HMM.ipynb>

Applications

1. PoS tagging, NER
2. Human identification
3. Face Expression Characterization
4. Genetics
5. Speech recognition
